SUMMARY

Frontend and AI software engineer with 3+ years of experience building scalable, user-centered web applications. Specialized in React, Next.js, and TypeScript, with growing expertise in Python-based AI development. Proven track record leading frontend teams, mentoring junior engineers, and shipping production software end-to-end — from requirements gathering through deployment.

EXPERIENCE

Software Engineer

2023 – 2025

Kaeyros Analytics (Remote) — Dortmund, Germany

- Led frontend development across the majority of company projects, shipping 4+ products on schedule with high code quality.
- Mentored a team of developers — including two junior engineers — driving a measurable lift in team productivity and code review velocity.
- Established Git/GitHub workflows and code-review standards that significantly reduced post-launch bugs and regressions.
- Owned the full frontend lifecycle, from boilerplate to production launch, partnering with UI/UX on wireframes and prototypes to keep design fidelity tight.
- Ran client discovery sessions to translate stakeholder requirements into clear technical specs, cutting requirement ambiguities and rework.

Software Engineer

2022 – 2023

Nobisoft (On-site) — Yaoundé, Cameroon

- Led projects end-to-end — requirements analysis, planning, delivery — keeping client expectations aligned with business objectives.
- Designed a microservices architecture integrating 5+ services, with a focus on scalability and clean orchestration.
- Owned deployment and technical documentation, enabling smooth handoffs and long-term maintainability.
- Built an e-commerce platform with a real-time live blog that auto-updated as product and promotion data changed.

SELECTED PROJECTS

Sema · sem-a.com · Kaeyros Analytics

Nov 2023 – Present

- Built real-time messaging with Socket.io and integrated the WhatsApp Business API for accurate delivery and read receipts.
- Designed a scenario chat engine using React Flow — users trigger predefined workflows on WhatsApp via scenario-specific keywords.
- Built a catalog management module supporting CRUD on products, Excel import/export, and onboarding flows.
- Wrote unit, integration, and end-to-end test coverage using Cypress, Selenium, and Playwright.
- Contributed to automated code-review tooling that reduced review times by ~40% via ML-assisted suggestions.

Anti-D (MIRA) · [mira.nrw](#) · Kaeyros Analytics

Jul 2023 – Present

- Led a German government initiative platform combating discrimination, built with four partner organizations.
- Engineered a multilingual reporting tool that increased report submissions by 40% across demographic segments.
- Built a dashboard with role-based access control and both qualitative and quantitative data visualizations.

EZE · [eze.ink](#) · Kaeyros Analytics

Oct 2023 – Present

- Co-led development of a professional social network for scientists supporting collaboration and knowledge sharing.
- Built the Digital Library module — users can read, upload, purchase, bookmark, and review books.

Swivy · Kaeyros Analytics

Jan 2024 – Present

- Co-led development of a SaaS platform tracking sales reps in real-time using Google Maps.
- Delivered route optimization and performance monitoring features that improved sales tracking efficiency by ~50%.

Nullpluseins · [nullpluseinsfestival.de](#) · Kaeyros Analytics

Apr – Oct 2024

- Led 80% of development on an event-booking and attendance management platform, prioritizing UX and frictionless booking flow.

Airtime · Kaeyros Analytics

- Directed a frontend team building a platform that lets users send airtime to multiple recipients across countries in a single transaction.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React, Redux, Next.js, TailwindCSS, React Flow

Backend: Node.js, Express, NestJS, FastAPI

Databases: MongoDB, MySQL

Testing: Cypress, Playwright, Jest, Selenium

Tools & APIs: Git, GitHub, GitLab, REST APIs, Socket.io, WhatsApp Business API, Mapbox, Figma

EDUCATION

Higher National Diploma

2019 – 2022

CITEC HITM — Yaoundé, Cameroon

CERTIFICATIONS

Frontend Developer Certification

2021 – 2022

Scrimba (Norway) — 80-hour program covering HTML, CSS, JavaScript, React, Git, and Next.js applied across real-world frontend builds.
